

# CO<sub>2</sub>

Our products offer significant advantages in the application of the electronic expansion valve even in CO<sub>2</sub> systems for refrigeration.

The goals are greater energy efficiency, reliability, and dedicated technical support.

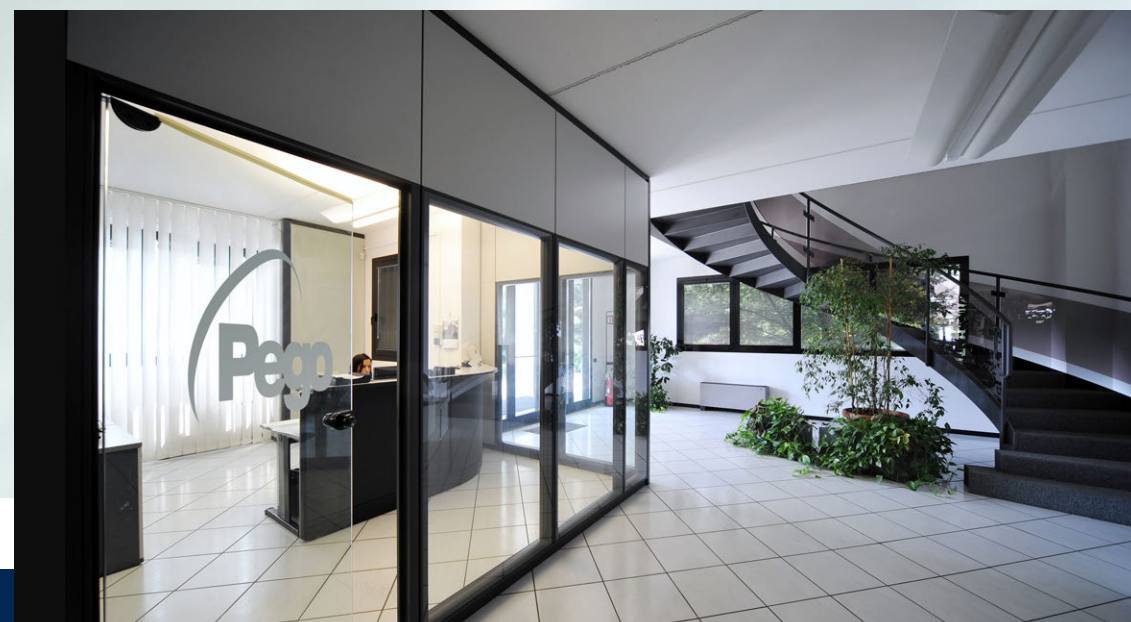

With our solution, companies can optimize their refrigeration systems while reducing their environmental impact.

We have been the technological partner of refrigeration professionals for over 25 years.

Our technological solutions are designed to bring value and efficiency to all your projects.

Thanks to an excellent technical service, we are able to satisfy every need, from design to after-sales assistance.

## PEGO SMART EXPANSION KIT

The integrated solution for expansion control from 0 to 80 kW

## TECHNOLOGY AND QUALITY BY PEGO AND CASTEL: YOUR SYSTEM DESERVES THE BEST

## A TAILORED SYSTEM: CUSTOM BUILT FOR YOUR NEEDS

Find out how we can improve the energy efficiency of your refrigeration circuit, with an integrated solution that combines technology, reliability, quality, and easy installation and use.

We are smart: from 0 to 80 kW, our system is designed to revolutionize the performance of your refrigeration circuit.

Thanks to the comprehensiveness of our product range and the perfect integration with Castel components, we can design and build the perfect solution for your needs.
