QUALITY POLICY

Pego Srl, engaged in the design of electrical panels and electronic regulation and control systems for refrigeration, air conditioning and humidification systems, constantly pursues the satisfaction of its customers.

Pego Srl considers compliance with the applicable compliance obligations relating to the Laws, Directives, Regulations and product and process standards as a prerequisite.

The Pego Srl Policy is based on the following principles:

- create value for all stakeholders and achieve a competitive advantage for the company
- eliminate or minimize risks for people's safety and environmental protection
- in order to assess and address the risk connected with the processes, reinforce and take advantage from the opportunities discovered, plan the process using a "risk-based thinking" approach
- achieve high performance of the products
- pursue continuous improvement of processes and products
- inform, educate, and train personnel on product quality issue
- define and monitor processes to reduce waste.

Pego Srl, in collaboration with the workers and suppliers, undertakes to pursue the objectives that derive from the principles of this policy.

President & Chief Executive Officer Pego S.r.l.
